PROFESSIONAL SUMMARY

Frontend Engineer with 2+ years of production experience delivering scalable web applications across e-commerce, SaaS, and healthcare domains. Specializes in React.js, Next.js, and TypeScript with a strong focus on component architecture, performance optimization, and REST API integration. Proven track record of reducing UI development time by ~30 % and cutting report load times by ~40 % through systematic engineering practices. Seeking a challenging frontend engineering role in Germany to contribute to high-quality, user-centric products.

SKILLS

- React.js & Next.js (App Router) | TypeScript & JavaScript | React Query
- HTML5 & CSS3 | Tailwind CSS & Bootstrap
- Redux (State Management) | Jest & React Testing Library
- FastAPI (Python) | REST API Integration
- PostgreSQL, AWS (S3, EC2), Firebase (Firestore, Auth) | Docker & Webpack/Vite
- Git, GitHub & GitLab | CI/CD (GitHub Actions)
- Performance Optimization | Data Structures & Algorithms (DSA)

PROFESSIONAL EXPERIENCE

Software Engineer

ApplogiQ 

07/2024 – Present
Tiruppur, TN, India

- Architected and delivered production-ready frontend solutions for clients in real estate, SaaS, healthcare, and e-commerce using React.js, Next.js, TypeScript, and Tailwind CSS.
- Integrated FastAPI-based REST APIs across 3 production applications, collaborating closely with backend and design teams to ship end-to-end features on schedule.
- Maintained cross-browser compatibility and responsive behaviour across all production deployments through systematic component-based UI architecture.
- Contributed to CI/CD pipeline setup using GitHub Actions, automating build, test, and deployment processes.

PROJECTS

Crayoon | ApplogiQ Production

08/2025 – 02/2026

Enterprise Uniform Management & E-Commerce Platform

- Built a full-scale uniform management and e-commerce application serving schools and corporate clients, covering product catalogue management, size allocation, order processing, and fulfilment workflows.
- Developed 20+ reusable React components across web and mobile platforms, reducing UI development time for new modules by ~30 % through consistent design system adoption.
- Integrated FastAPI backend services for real-time order handling, inventory updates, and client management via RESTful APIs.
- Co-authored Jest + React Testing Library testing strategy covering component-level and form-validation logic.

Vigilance | ApplogiQ Production

03/2025 – 08/2025

Security Assessment & Reporting System

- Engineered a data-driven web application enabling field managers to conduct property security assessments, analyse risks, and generate structured reports
- Reduced report load time by ~40 % for datasets of 1,000+ records through DOM virtualisation and lazy loading on mobile and tablet devices
- Designed interactive dashboards and dynamic form workflows with React.js, integrated with FastAPI for real-time data storage and retrieval.

ShopQ | ApplogiQ Production

09/2024 – 03/2025

SaaS E-Commerce Landing & Conversion Interface

- Delivered a high-conversion landing platform for an e-commerce SaaS product, showcasing product catalogue management, order tracking, and customisable storefronts.
- Developed responsive, component-driven UI with React.js and Bootstrap, optimising structured user flows and cross-browser compatibility.
- Implemented validated lead capture forms and interactive product demos, directly supporting the client's demo-booking pipeline for go-to-market launch.

EDUCATION

Bachelor of Business Administration with Computer Application

09/2021 – 04/2024
Coimbatore, TN, India

RVS College Of Arts And Science

- Focused on a combination of business fundamentals and computer application development, including programming concepts, web technologies, and software systems.
- Gained foundational knowledge in database management, application design, and IT systems, complemented by practical exposure to front-end development and real-world project implementation.

LANGUAGES

Tamil

Native

English

Professional working proficiency (B2+)

German

Beginner (A1), currently learning towards B2

COURSES

Full Stack Web Developer Certification

03/2023 – 06/2023
Online

SkillVertex

- Completed intensive full-stack web development programme covering React.js, responsive UI design, and REST API integration.

ADDITIONAL INFORMATION

Availability : 15 days notice

Remote / On-site : Flexible

Open to relocation : Germany (EU Blue Card eligible)

Work authorisation : Requires visa sponsorship
